EXPERIENCE

GOOGLE | 2020-Present

Android Phone | Lead product designer

- Spearheading the AI strategy for Android Phone, resulting in the development of innovative productivity features that drove significant daily user engagement and contributed to increased Pixel sales. (One of these features, "Call Notes," received a patent.)
- Leading the overall product design direction for Android Phone, providing strategic guidance to the UX team and fostering cross-functional partnerships across Android to ensure a cohesive user experience.
- Mentored and provided guidance to other designers on the team, fostering a collaborative and supportive team environment.
- Serving as an accessibility advocate for the team, conducting a11y reviews for feature releases and championing inclusive design practices.

Area 120 | Lead product designer

- Led the design strategy for an AI-driven video editing tool, driving a complete redesign to prepare it for market launch and differentiate it from competitors.
- Conducted user research to identify new features, managed and mentored a team of volunteer designers, and presented the product to Google teams to secure buy-in.
- Achieved significant market differentiation, launched and tested the product with trusted testers, and successfully integrated key features into existing products at YouTube.

Google Chat & Gmail | Senior product designer

- Designed and launched a new quoted reply feature for Google Chat, resulting in a 9% adoption rate among users.
- Developed two new features for Gmail (templates and multi-send) aimed at over 400 million small business/solopreneur customers, contributing to increased signups and the success of Workspace's small business SKU.
- Partnered with Workspace security teams to enhance spam filtering, blocking, and other secure messaging improvements, leading to a significant increase in block/reports.

ZUME | 2018-2020

Senior product designer

- Developed a tool that streamlined the market planning process, reducing the time required for key tasks from two weeks to a few hours, enabling the team to launch targeted marketing campaigns within hours.
- Partnered with data science to create a simulation tool for the sales team, generating interest in Zume's technology among potential clients and gathering valuable input for product development.

EXPERIENCE

ZUME | 2018-2020 (CONT.)

Senior product designer

- Led the redesign and visual rebranding of internal tools and the company website, improving user experience and aligning with the updated brand identity.
- Fostered a design-centric culture through process updates, workshops, and presentations, promoting collaboration and design thinking across the organization.

ZYNGA | 2016-2018

Senior user experience designer

- Identified a high-value growth opportunity and partnered with two leading messaging apps, Apple iMessage and Facebook Messenger, to define new turn-based game interactions, resulting in millions of new players and expanding the user base to casual gamers on messaging platforms.
- Championed user safety by creating features that enhanced protection tools and closed security loopholes, reducing support tickets by over 80% and generating positive user feedback.
